

SID No : 19009210

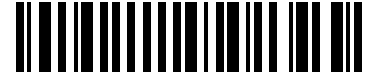

Branch : SKS HOSPITAL

Baby. KAYALINBA MAKILNAN

Age / Sex: 1 Y / Female

Ref. By : **SKS Hospital & Postgraduate Medical Institute**

Patient ID : 1900022625

Collected Date : 10/03/2023 / 19:47

Received Date : 11/03/2023 / 04:38

Reported Date : 12/03/2023 / 17:37

Final Test Report

Page 1 of 2

Specimen	Test Name	Result	Units	Reference Range / Method
BIOCHEMISTRY				
Electrophoresis - HB				
WHOLE BLOOD	Hb-AO	76.9	%	0 - 1 month : 17.7 - 54.0 1 - 2 months : 37.1 - 70.6 2 - 3 months : 41.0 - 84.0 3 - 4 months : 68.2 - 88.6 4 - 5 months : 74.9 - 95.6 5 - 8 months : 83.5 - 95.8 8 - 12 months : 91.7 - 96.7 Above 1 Year : 83.2 - 90.79 (HPLC)
WHOLE BLOOD	Hb-A2	5.6	%	0 - 1 month : 0.0 - 1.3 1 - 2 months : 0.4 - 1.9 2 - 3 months : 1.0 - 3.0 3 - 4 months : 2.0 - 2.8 4 - 5 months : 2.1 - 3.1 5 - 8 months : 1.9 - 3.5 8 - 12 months : 2.0 - 2.3 Above 1 Year : 0.0 - 3.7 (HPLC)
WHOLE BLOOD	Hb-F	2.5	%	0 - 1 month : 46 - 81 1 - 2 months : 29 - 61 2 - 3 months : 15 - 56 3 - 4 months : 9.4 - 29 4 - 5 months : 2.3 - 22 5 - 8 months : 2.3 - 13 8 - 12 months : 1.3 - 5.0 Above 1 Year : 0.0 - 2.0 (HPLC)
WHOLE BLOOD	Hb-S	-	%	(HPLC)

Final Test Report

Page 2 of 2

Specimen	Test Name	Result	Units	Reference Range / Method
WHOLE BLOOD	Hb-C	-	%	(HPLC)
WHOLE BLOOD	Hb-D	-	%	(HPLC)
WHOLE BLOOD	Hb-E	-	%	(HPLC)
WHOLE BLOOD	Others	-		(HPLC)
WHOLE BLOOD	Impression	See comments.		(HPLC)

Comments:Hemoglobin electrophoresis shows increased HbA2 (5.6 %).Suspicious for a Hemoglobinopathy,the possibility being Beta Thalassemia trait.Advised correlation with iron studies and repeat after 1 month.

Note:

- All results have to be correlated with age and history of blood transfusion.
- If there is history of blood transfusion in last 3 months, repeat test after 3 months from last date of transfusion.
- In case of haemoglobinopathy, Parents or family studies and counseling is advised.
- This test detects Beta thalassaemia and haemoglobinopathies.
- Capillary electrophoresis or DNA analysis is recommended to rule out alpha thalassaemia.
- DNA analysis may be required to rule out silent carriers.
