(Affiliated to PSG Institute of Medical Sciences & Research)
PEELAMEDU, COIMBATORE - 6410 04. Phone : 0422 - 2570170

Patient Name : MOULEESWARAN.E

Age / Gender : 7 Months / Male

Department(Specialty) : PAEDIATRIC SURGERY 3OPD

Location : P4Ps 3-

Patient Id / Visit Id : O23046219 / EI2300933258

Date : 24/11/2023 09:55 am

Doctor / Unit Chief : Dr.PAVAI ARUNACHALAM

Type : Outpatient

REVIEW NOTES

Clinical Notes

Left PUJO - Left pyeloplasty done
**stent removal done on 22/08/23 under GA

USG on 02/03/23 :

- severe left hydronephrosis
- right inguinal hernia
- small left bubonocoele
- left AP-18MM cortical thickness 3-4mm in upper mid and lower pole regions

Neurosonogram on 27/5/23 - normal

Echo(4/4/23) :

- 3mm ASD bidirectional shunt IVS intact 1mm PDA left to right shunt PG-31mmhg trivial TRPG -27MMHG good biventricular function moderate to severe PAH NO coa

7/4/23:

- no PDA no pericardial effusion mild TR good contractility estimated LVSP-26mmhg

10/4/23 - no ductus arteriosus good biventricular function trivial TR noPAH

USG on 04/04/23 :

- enlarged left kidney with thinned out parenchyma? pelviureteric junction stenosis normal right kidney

USG on 07/04/23 :

- severe hydronephrosis of left kidney with abrupt narrowing at pelvoureteric junction and cortical thickening -likely left PUJO

25/4/23

- severe hydronephrosis of left kidney -likely PUJO

13/5/23:

- severe hydronephrosis of left kidney -likely PUJO

Baby on sporidex

USG small parts scrotum on 07/07/23 :

Right moderate hydrocele.

EC scan on 09/07/23 :

Enlarged hydronephrotic left kidney with impaired function and findings suggestive of partial PUJO.

Normal functioning right kidney with non-obstructive clearance.

Left kidney - 24%

Right kidney - 76%

Investigation & Procedure orders

Follow Up

RENAL DTPA(left PUJO) - *operated*

Advice & Follow up

Notes : Left PUJO operated - decreased function - 24%
On examination - Scar healthy
Right testis canalicular
Left testis down
Prepuce partially retractable

Advice : For right orchidopexy
Plan for DTPA during that time
To operate early - counselling done

USG KUB

FINDINGS

Right kidney measures 5.3 x 2.2 cm, normal in size and shows normal parenchymal echoes. Cortico medullary differentiation present. Pelvicalyceal system appears normal.

Left kidney measures 4.1 x 1.5 cm, normal in size and shows normal parenchymal echoes. Cortico medullary differentiation present. Moderate dilatation of pelvicalyceal system seen. APD of renal pelvis measuring 10mm. Renal parenchymal thickness measures 4-5mm.

Urinary bladder appears normal.

IMPRESSION

Left PUJ obstruction - status postop:
* Moderate left hydronephrosis
