

Patient Name	MR.GOKUL	Age/Sex	15YRS/M
Referred By	DR.A SELVAMANI,D.G.O	Visit Date	24.06.2025

Thank you for your kind referral

USG –Abdomen

Liver: Size - normal. Echo texture-uniform. No focal or diffuse abnormality.

Intra hepatic biliary radicals and Common bile duct – not dilated.

The hepatic and portal veins - normal.

Gall bladder: Distension -adequate. No mass / calculus. Wall thickness – normal.

Pancreas: Size – normal. Echo texture-normal. The pancreatic duct is not dilated.

No calcifications or peri pancreatic collections.

Spleen: Size -normal. Echo texture – uniform. Long axis- 9.6cm. No focal lesion.

No hilar collaterals.

Right kidney: measures 10.5 X 4.5cms. Position and size – normal.

Left kidney: measures 11.3 X 5.6cm. Position and size – normal.

Both renal cortical echoes- normal. CMD –maintained. PCS- not dilated. No calculus.

Urinary Bladder: Is normal in contour. No intra luminal echoes are seen.

Wall thickness is normal. No mass or calculus seen.

Prostate - normal in size and echoes.

RIF- Dilated Appendix (7mm) with perforation at its tip with surrounding evolving abscess with significant mesenteric edema and about 20 ml of echogenic fluid collection (pus) noted around it.

- ✓ Distal ileum and cecum shows mural thickening.
- ✓ Appendix appears to be pelvic in position.
- ✓ Surrounding mesenteric fat appears echogenic and edematous.
- ✓ Multiple large mesenteric lymphadenopathies noted.
- ✓ There is mass formation at present.

Retro peritoneum:

No mass is seen in the Para aortic, adrenal and retroperitoneal regions.

IMPRESSION:

- Perforated appendix with surrounding pus collection (20-30ml) with significant mesenteric edema and distal ileum and cecal mural thickening.
- Multiple large mesenteric lymphadenopathies
- APPENDICULAR MASS FORMATION
- Normal study of Liver, Pancreas, Spleen, Both Kidneys, UB, prostate and great vessels.
